# Evidence based nature Management

# How to deal with evidenced based management ?

Case from the real world

Discussion of principles: how can facilitate  
the applicability of evidence based management

# Why evidence based management

- > **Flexibility, can take into account local information and competence of stakeholders**
- > **Updated can include new knowledge as it emerges**

# Why not evidence based management

- > **Danger of actions based on incomplete knowledge**
- > **Wrong burden of prove for protection: poor level knowledge = “no problem”**
