Every EU citizen generates on average 200 kg of urban bio waste every year.

VALUEWASTE proposes an integrated system for urban biowaste valorisation into key strategic products for the EU.

THREE VALORISING LINES OF URBAN BIOWASTE

- Selective collection in cities
- Biowaste Treatment in Waste Management Plant
- Treatment by Industrial Partners & Intermediate Product
- Final Marketable Product

EXPECTED IMPACTS OF VALUEWASTE

- 1,800 tonnes of urban biowaste annually valorised in Murcia (Spain)
- More than 60 tonnes of protein yearly produced
- Valuable nutrients for EU agriculture are recovered from residual streams
- Improved perception of citizens on urban biowaste as a local source of valuable materials
- Evidence-based support for future EU policies, towards the implementation of the EU Circular Economy strategy

WORK-PLAN: 12 work packages | PARTNERS: 17 from 6 EU countries (ES, DK, FR, FI, BE, SE)
