

# Standardization of N<sub>2</sub>O measurement methods at Danish farmers' fields

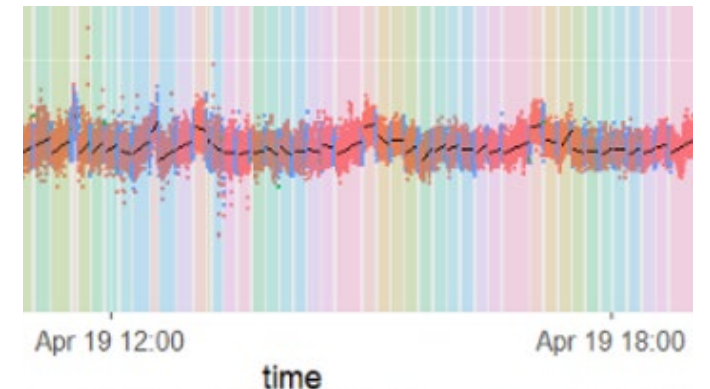

---

## REM – Reduction of emissions from fields

- To gain more knowledge about the magnitude in temporal and spatial scale of N<sub>2</sub>O emissions
- Comparison of manual and automatic methods
- Standardization for methods for validation of climate technologies
- For faster implementation of the technologies

*Business Developer Ann Britt Væge,  
Danish Technological Institute, Denmark*

# Value from field emission data
