## 1. Introduction

Although this document was written for individual authors contributing to IOS Press books, it can also be used by the author/editor preparing a monograph or an edited volume in MS Word. Authors should realize that the manuscript submitted by the volume editor to IOS Press will be almost identical to the final, published version that appears in the book, except for the pagination and the insertion of running headlines. Proofreading as regards technical content and English usage is the responsibility of the author.

## 2. Formatting the manuscript

Please download the two available templates:

- *IOSPressBookArticleWordTemplate*
- *IOSPressBookArticleWordTemplate\_with\_Text*

Either can be used to apply styles to your document. For the installation please consult the Help of your Office version.

### 3. Typographical Style and Layout

#### 3.1. Type Area

**Select A4 as the paper size in the document settings, not Letter Size.** The type area is 12.4 cm wide and 20 cm long. This area must be used to the maximum, but not be exceeded. The following margin settings for *A4 size* paper will produce the correct result: top 5.5 cm; bottom: 4.2 cm; left and right: 4.3 cm.

#### 3.2. Font

The recommended type font for running text (body text) is 10 point Times New Roman. For literal text, please use one of the sans-serif fonts, or Courier.

Use roman as default style, and keep bold and italics for section headings, sub-section-headings, author's affiliations, and special emphasis. Font sizes and styles are indicated in Table 1. In order to get the correct font size and spacing, use the template styles as much as possible to format your text.

#### 3.3. Title Page

Apply the styles defined in Table 1 for the title, author's name, affiliation(s) and abstract. *Please ensure there is a 24 pt blank line above the title.* Use capitals for the author's surname, and superscripted alphabetic characters to link the authors and their affiliations.

Use bold for the words "Abstract." and "Keywords." The first sentence of the Abstract should follow the word "Abstract." on the same line.

#### 3.4. General Layout

Use single line spacing throughout the document.

Keep the abstract, running text and long captions justified; the table text, section headings and references aligned left and center only the chapter title, author's name and affiliation.

January 2020

Indent the first line of each paragraph by 0.63 cm, except for the first paragraph after a heading.

### 3.5. (Sub-)Section Headings

Apply the styles defined in Table 1 to the headings.

Use initial capitals in the headings, except for articles (a, an, the), coordinate conjunctions (and, or, nor), and prepositions, unless they appear at the beginning of the heading.

### 3.6. Footnotes and Endnotes

Please keep footnotes to a minimum. If they take up more space than roughly 10% of the type area, list them as endnotes, before the References. Footnotes and endnotes should both be numbered in arabic numerals and, in the case of endnotes, preceded by the heading "Endnotes".

### 3.7. References

Please use the Vancouver citing & reference system. Place citations as numbers in square brackets in the text. All publications cited in the text should be presented in a list of references at the end of the manuscript. List the references in the order in which they appear in the text. Some examples:

#### Journal article:

Petitti DB, Crooks VC, Buckwalter JG, Chiu V. Blood pressure levels before dementia. *Arch Neurol.* 2005 Jan;62(1):112-6.

#### Paper from a proceedings:

## 4. Illustrations

### 4.1. General Remarks on Illustrations

The text should refer to all the illustrations.

Refer to illustrations in the text as Table 1, Table 2, Figure 1, Figure 2, etc., not with the section or chapter number included, e.g. Table 3.2, Figure 4.3, etc. Do not use the words “below” or “above” referring to the tables, figures, etc.

Do not collect illustrations at the back of your article, but incorporate them in the text. Position tables and figures with at least 2 lines extra space between them and the running text.

Illustrations should be centered on the page, except for small figures that can fit side by side inside the type area. Tables and figures should not have text wrapped alongside.

Place figure captions *below* the figure, table captions *above* the table. Use bold for table/figure labels and numbers, e.g.: **Table 1.**, **Figure 2.**, and roman for the text of the caption. Keep table and figure captions justified. Center short figure captions only.

The minimum *font size* for characters in tables is 8 points, and for lettering in other illustrations, 6 points.

On maps and other figures where a *scale* is needed, use bar scales rather than numerical ones of the type 1:10,000.

### 4.2. Quality of Illustrations

Avoid using illustrations taken from the Web. The resolution of images intended for viewing on a screen is not sufficient for the printed version of the book. If you are incorporating screen captures, keep in mind that the text may not be legible after reproduction.

Ensure consistency by using similar sizes and fonts for a group of small figures. To add lettering to figures, it is best to use Helvetica or Arial (sans serif fonts) and avoid effects such as shading, outline letters etc.

January 2020

### 4.3. Color Illustrations

Illustrations will only be printed in color if the volume editor agrees to pay the production costs for color printing. Color in illustrations will be retained in the online (ebook) edition.

## 5. Equations

Position equations flush left with the margin, preceded as well as followed by one blank line, or use the style defined in *IOSPressBookArticleWordTemplate*.

Number equations consecutively, not section-wise. Place the numbers in parentheses at the right-hand margin, level with the last line of the equation. Refer to equations in the text as Eq. (1), Eqs. (3) and (5).

## 6. Fine Tuning

### 6.1. Type Area

**Check once more that all the text and illustrations are inside the type area and that the type area is used to the maximum.** You may of course end a page with one or more blank lines to avoid ‘widow’ headings, or at the end of a chapter.

### 6.2. Capitalization

Use initial capitals in the title and headings, except for articles (a, an, the), coordinate conjunctions (and, or, nor), and prepositions, unless they appear at the beginning of the title or heading.

### 6.3. Page Numbers and Running Headlines

You do not need to include page numbers or running headlines. These elements will be added by the publisher.

## 7. Submitting the Manuscript

Submit the following to the volume editor:

1. MS Word document;
2. Identical high resolution PDF file with all fonts embedded. We recommend Adobe Acrobat Distiller and the job option *Press-Optimized*.)

Please make sure you do not submit more than one version of any item.
