# BALTIC SEA SCIENCE CONGRESS

– understanding transitions in the Baltic Sea

## List of posters at BSSC2021

Number	Presenter	Title	Theme
1	Anete Fedorovska	Invasive Round Gobies ( <i>Neogobius melanostomus</i> ): Impact on Benthic Fauna in Latvian Coastal Waters	1
2	Anna Rutgersson	Natural Hazards and Extreme Events in the Baltic Sea Region	1
3	Erika Cepiene	Dane River compound flood risk if Baltic Sea level rise due to climate change	1
4	Joonas Wasiljeff	Preliminary Pb isotope stratigraphy of two Baltic Sea discoidal ferromanganese concretions	1
5	Marcus Reckermann	The Baltic Earth Assessment Reports (BEAR)	1
6	Marcus Reckermann	The Baltic Sea Climate Change Fact Sheet 2021	1
7	Rasa Idzelytė	Numerical modelling of ice thermodynamics and its future projections in the southeastern Baltic Sea (the Curonian Lagoon)	1
8	Umgiesser, G.	Ecosystem services in the Lithuanian coastal zone under climate change: a modelling study	1
9	Baptiste Serandour	The influence of environmental conditions on mesozooplankton diet	2
10	Camille de la Vega	Effect of eutrophication on ecosystem functioning in Baltic Sea lagoons	2
11	Evita Strode	Bioassays and biomarkers approach to detect targeting reproductive variables of the benthic amphipod <i>Monoporeia affinis</i> to assess environmental health of the Gulf of Riga (eastern Baltic Sea)	2
12	Gotje von Leesen	Metabolic challenges in Baltic Sea fishes disentangled by the carbon isotope composition of otoliths	2
13	Janni Heikkinen	The importance of genetic diversity in the marine diatom <i>Skeletonema marinoi</i> during and after antibiotic stress	2
14	Kris-Emil Mose Jørgensen	Multi-species spatiotemporal distribution of fish larvae in the Kattegat	2
15	Mindaugas Zilius	Common macrofauna with different lifestyle harbor unique microbial communities	2
16	Roxana Preston	Panmixia within the Baltic Sea: high genetic connectivity between epilithic and free-living marine macroalga <i>Fucus vesiculosus</i>	2

17	Saulė Medelytė	Identification and mapping of reef biotopes using underwater imagery in southeastern Baltic Sea	2
18	Sonja Repetti	Salinity modifies the effect of resource availability on phytoplankton communities	2
19	Agneta Andersson	Does Temperature Affect the Production of Halogenated Natural Products in Baltic Macroalgae? A Comparison of 2017 vs. 2018	2
20	Toma Dabulevičienė	The effect of coastal upwelling events on the fish assemblages at the SE Baltic Sea Coast	2
21	Aarno Kotilainen	SEABED SUBSTRATE DATA OF EUROPEAN SEAS – EMODnet Geology	2
22	Åsa Austin	Stronger effect of species identity than shading on aquatic plant community productivity and interspecific competition	2
23	Ksenia Pazdro	Caffeine and selected pharmaceutical residues in the southern Baltic Sea waters – Gulf of Gdańsk case study	3
24	Lilianna Sharma	Ionic liquids – a potential threat to the marine microorganisms	3
25	Marta Barone	Occurrence and spatial distribution of microplastics in the surface waters of the Baltic Sea and the Gulf of Riga	3
26	Ville Junttila	Sediment stratigraphy studies reveal variable POP concentration trends in the Baltic Sea environment	3
27	Vilnis Frishfelds	Transport of microplastics from coastal to basin scale in Daugava - Gulf of Riga - Baltic sea system	3
28	Zrinka Mendas	Scientists and Exercise for Health	3
29	Alexander Sokolov	Assessment of marine data from heterogenous databases using Data Assimilation System	4
30	Victor Alari	LainePoiss® – a lightweight and ice-resistant wave buoy	4
31	Idrissa Y. Hamad	Drone-based characterization of seagrass habitats in the tropical waters of Zanzibar	4
32	Mihail-Constantin Carausu	EMODnet Ingestion and safe keeping of marine data	4
33	Greta Srėbalienė	An early warning system on invasive alien species in the Baltic Sea ports: from idea to the implementation	5
34	Jamie Jenkins	Regionally Extended Shared Socioeconomic Pathways for the Offshore Wind Industry in Finland	5
